

About Us

The Monroe Science Center provides a hands-on learning experience for children and adults alike.

We highlight many of the wonderful elements that make Monroe and Union County so unique. Union County has a rich history of agriculture, technology, and aerodynamics, all of which are highlighted at the Monroe Science Center.

"This is a fun place to spend several hours with hands-on learning. I enjoyed it as much as my grandson. "

"Great way to spend some time with the kids that even the adults will enjoy!"

"Great fun for the entire family! Friendly staff! "

**Dr. Christine
Mann Darden**

Dr. Christine Mann Darden is internationally known for her research into supersonic aircraft noise, especially sonic boom reduction, and is recognized for her groundbreaking achievement as the first African American woman at NASA Langley to be appointed to the top management rank of Senior Executive Service. She is equally known for her efforts to inspire and educate generations of aerospace scientists and engineers.

What to expect

Once you enter into the Monroe Science Center, you are welcome to explore on your own. Staff is always available to explain an exhibit or answer any of your questions.

Exhibits are designed to be hands on for adults to learn and play side by side. We also have a sensory room and nursing room available.

All children under 14 must be with an adult at all times for their safety. If you have a large group, we enforce a 1:10 ratio of adults (16+) to children and children must be chaperoned at all times.

Free on-site parking available.
