### Temporary Road Closure - Water Resources Utility Improvement

The City of Monroe Water Resources Construction Division will be replacing approximately 480 linear feet of existing 8-inch cast iron water main along E. Green St. between Hough St. and S. Thompson St. to improve water service to customers in this area. Construction activities are scheduled to begin on September 28, 2020 and are anticipated to conclude by October 30, 2020.

Temporary road closures may be necessary within the project limits between the hours of 8AM-5PM, Monday-Thursday. Therefore, it is suggested that alternate routes be considered. The City will make efforts to maintain access to all residences along E. Green St. Emergency service vehicle access will be provided at all times as well as normal collection of garbage and residential/commercial deliveries.

There may be a short term interruption to water service during construction of the new water main and transfer of services. The City will make every effort to notify customers in advance.

All damaged/disturbed items will be restored or replaced at the end of the project.

We apologize in advance for any inconveniences experienced during our construction.

If you have any questions or concerns, please call the City of Monroe Water Resources Department at 704-282-4601.
